Education

Northeastern University, Khoury College of Computer Sciences, Boston, MA

Sept. 2023 – December 2026

Candidate for Bachelor of Science in Computer Science and Financial Technologies

Relevant Coursework: Financial Management, Corporate Finance, Artificial Intelligence, Database Design, Algorithms and Data

Skills

Product & Strategy: Product Strategy, Stakeholder Communication, Executive Presentations, Technology Portfolio Management

Technical Skills: Java, TypeScript, Python, SQL, HTML/CSS, React, Node.js, Micronaut, LangChain

Tools: Figma, Jira, LeanIX, Helix, Git, Postman, MySQL

Experience

Pegasystems, Waltham, MA, Software Engineering Intern

June 2026 - Present

- Built a conversational AI testing platform enabling teams to validate customer-service voice bot experiences across voice and text channels.
- Designed configurable workflows for interruption, split-utterance, and multi-turn scenarios to improve AI testing efficiency.
- Collaborated with engineers and stakeholders to support customer-service automation initiatives and enhance testing capabilities across multiple business use cases.

MFS Investment Management, Boston, MA, Enterprise Architect Co-op

Jan. - June 2026

- Evaluated enterprise software requests using Jira, Helix, and LeanIX to support cost-conscious technology investment decisions and software portfolio governance.
- Built LeanIX dashboards from 1,000+ software records to highlight budgeting discrepancies, lifecycle risks, and portfolio trends for leadership review.
- Developed and presented technology portfolio recommendations to senior leadership, translating architecture and software cost data into actionable business insights.

Pegasystems, Waltham, MA, Enterprise Applications Intern

June - Sept. 2025

- Prototyped a real-time conversational AI voice bot using Node.js, TypeScript, WebRTC, speech-to-text, and text-to-speech technologies to explore customer-service automation use cases.
- Leveraged OpenAI Realtime function calling to connect conversational AI workflows with backend actions, demonstrating opportunities to streamline customer-service processes.

Northeastern ITS, Boston, MA, Enterprise Architect Co-op

Jan. - June 2025

- Created and maintained 600+ LeanIX factsheets centralizing application, capability, and dependency data across the university technology portfolio.
- Built reports, dashboards, and architecture visualizations that informed application lifecycle planning, technology governance, and IT investment discussions.
- Collaborated with stakeholders to translate enterprise data into actionable insights supporting strategic technology initiatives.

Extracurriculars

Disrupt: The Fintech Initiative, President

Sept. 2023 - Present

- Lead cross-functional student teams in planning fintech programming, workshops, and professional development initiatives across the organization.
- Organized a 9-week startup competition, coordinating participants, mentors, and industry professionals.
- Foster relationships with fintech professionals, founders, and campus partners to expand networking, mentorship, and experiential learning opportunities for members.

VitalLink Product, Verizon Smart Campus Competition Winner

Oct. 2025 - May 2026

- Won Verizon's Smart Campus Competition with VitalLink, a ward-level IoT patient monitoring concept designed for Verizon Private 5G-enabled healthcare environments.
- Developed the product strategy, architecture narrative, and ROI model to communicate clinical and financial value.
- Presented the solution's business impact and technology roadmap to Verizon judges, and university leadership.

Projects

BudgetBound App, Disrupt Ventures 2024 Pitch Competition Winner

- Won Disrupt Ventures 2024 Pitch Competition with BudgetBound, a student budgeting app concept focused on improving college financial planning.
- Presented the product vision and financial wellness value proposition to competition judges.

BucketBuddies App, Oasis

- Developed a social platform via React and SQL where users create bucket lists and connect through interest-based matching.
